

Toyota Jamaica Web Review

A mobile and desktop review of toyotajamaica.com, with site initiatives ranked against the business goals we think matter most to Toyota Jamaica. The goals are our hypotheses. The ranking in section 4 changes when you change their weights.

September 2026 Reviewed on iPhone 13 and a 1440px desktop Live site, code and 10+ competitor sites

1 • SUMMARY

The shop window is good.
Several doors behind it are stuck.

WORKING

- New-vehicle prices are public, which most Jamaican rivals don't do.
- The desktop vehicle menu is strong.
- Live chat, a recall lookup and a well-built certified pre-owned section.
- Local RAV4 2026 campaign creative.

BROKEN OR LEAKING

- Test-drive, quote and service forms are broken on phones. **FIXED**
- Find a Dealer loads blank. **FIXED**
- No tap-to-call or WhatsApp anywhere on the site.
- A homepage slide links to a lapsed domain that is now for sale. **STILL OPEN**
- The mobile homepage downloads 20 MB.

WHAT WE RECOMMEND

- **First 90 days:** fix the broken lead paths, make calling and WhatsApp one tap away, count every lead, and cut page weight.
- **Also first 90 days:** close the privacy and server-risk gaps.
- **After that:** build the tools Toyota buyers use elsewhere (payments, service booking, trade-in), and make the case for a new Toyota over an imported used car.

0	4 of 4	37	20 MB	2 of ~8
tap-to-call or WhatsApp links across 15 key pages	main lead forms broken on phones (test drive, quote, service, parts). Fixed 25 September.	Lighthouse mobile performance score for the homepage (out of 100)	downloaded by the mobile homepage, 18 MB of it images	lead types tracked as conversions in analytics

First fixes are live initiative 1

We have released the first set of fixes to the live site and checked them there. The rest of this report describes the site as we found it; items marked **FIXED** are now resolved.

FIXED AND LIVE

- **Forms on phones.** Test-drive, quote, service and parts forms stack to one column again, with full-width fields and readable labels.
- **Find a Dealer.** The dealer list and map load again.
- **Lead email bugs.** A double-clicked submit no longer sends a duplicate lead, including on the customer opt-in form. A customer message containing '&' or '<' no longer breaks the lead email. Quote answers the form already collected (timeframe, payment method, preferred contact, best time, company, address) now reach the sales team instead of being dropped. The emails' format, recipients and addresses are unchanged.

STILL OPEN IN INITIATIVE 1

- Remove the homepage slide that links to the lapsed toyotajamaica360.com domain. It is still live. This is a content change we can make right away.
- Restrict the Google Maps key to the site's domain, and add a plain-text fallback so branch details show even if the map fails.
- Clearer recall results, with Call and Book buttons.
- Move lead recipients out of code into an admin setting.

SALES IMPROVEMENTS TO PLAN WITH YOUR SALES TEAM

- **Lead reference details.** Each lead email carries a malformed date and the same reference number. We want to confirm with whoever manages the receiving system how these fields are used before we change them.
- **Model and trim on every lead.** Carry the model the shopper was viewing into the form (initiative 8).
- **Shorter forms and customer confirmations.** Fewer required fields, a thank-you page, and an email or SMS confirmation with expected response times (initiative 8).
- **One pipeline for every lead type.** Service, parts, pre-owned, trade-in and fleet leads currently go to separate inboxes. Route them all to your sales system with campaign source attached, plus response-time alerts (initiative 14).

Keep and build on these

- **Price transparency.** Every model shows a "From USD" price in the menu and on its model page. Kia Jamaica and Hyundai Jamaica show none.
- **Desktop vehicle menu.** Photos, prices and body-type tabs for all 14 models, one hover away.
- **Local storytelling.** The 2026 RAV4 creative was shot at Emancipation Park and in the Blue Mountains. Kia Jamaica's homepage uses generic global imagery.
- **Certified pre-owned.** Listings are clean, priced in J\$, with mileage, branch and a working inline enquiry.
- **Recall lookup and live chat.** We found neither on the Jamaican competitor sites we surveyed.
- **Solid base.** HTTPS, Cloudflare in front, current WordPress core, an SEO plugin already in place.
- **A sister site to borrow from.** Toyota Trinidad & Tobago, also a Toyota Tsusho company, runs on an almost identical template. It already has a finance calculator we could adapt.

Desktop New Vehicles menu: every model shown with a photo and a starting price.

3 • GOALS

What we think the site is for

We inferred six goals from the site, the market and the business mix: new vehicles, pre-owned, fleet, service, parts and body shop. They are hypotheses for us to confirm with you. Each initiative below is scored 0–3 against each goal.

G1

More qualified new-vehicle leads

New vehicles are the core business. Every model page funnels to test-drive and quote forms that don't work on phones and lose the model the shopper was looking at. Most buyers finance, and the site offers no payment answer.

Measure by: Qualified leads per month by type and model · form completion rate (mobile vs desktop) · model-page-to-lead rate

G2

Grow service and after-sales revenue

Service, parts and body shop are recurring, higher-margin revenue. Today service booking is a long request form that breaks on phones, and nothing brings owners back.

Measure by: Online service bookings by branch · mobile booking completion · owner retention (from the dealer management system)

Grow certified pre-owned and trade-in

Measure by: Live pre-owned listings · enquiries per listing · trade-in submissions and trade-in-to-sale rate

Reinforce trust as the official Toyota distributor

Measure by: Mobile Core Web Vitals pass rate · organic visits to model pages · 404s on key paths · Google Business Profile actions

Know which marketing sells cars and fills service bays

Measure by: Share of lead types tracked (target 100%) · cost per lead by channel and model · response time by lead type

Reduce platform, security and compliance risk

Measure by: Supported server and PHP versions · consent-compliant tag firing · changes shipped through staging · staff updates made without a developer

5 · ROADMAP

Suggested sequence

The order follows dependencies as well as scores. Measurement comes early so every later change can be judged. Bigger builds land on the upgraded platform with a staging site.

Now 0–3 mo

01	Fix broken lead paths	PARTLY FIXED	S
02	Contact-first mobile		S
03	Measurement foundation		M
04	Speed quick wins		S
05	Privacy and consent		S
06	Security hardening		S
07	Hygiene bundle		S

Low effort, high certainty. These stop leads being lost today and put measurement in place so we can prove results.

Next 3–6 mo

08	Lead forms rebuild		M
09	Pricing and finance path		M
10	Service and after-sales hub		L
11	Homepage and brand refresh		L
12	Search and share visibility		M
13	Platform upgrade and staging		L
14	Lead routing into one pipeline		L

Bigger builds that need your inputs (finance partners, service menu, CRM) and are best shipped on the upgraded platform.

Later 6–12 mo

15	Shopping tools and Hybrid hub	M
16	Pre-owned and trade-in growth	L
17	Owner retention	L
18	Business, fleet and storm-season hub	M
19	Stock availability and reservation	XL

Growth features that depend on earlier work: payments, lead routing and a stable platform.

6 • INITIATIVES IN DETAIL

What each one involves

01

Fix broken lead paths

Forms, dealer map, lapsed link, recall messages

Now • 0–3 mo **Effort S**

DONE • LIVE 25 SEPTEMBER

- Phone form layout fixed for test drive, quote, service and parts.
- Find a Dealer map and list load again.
- Lead emails: no duplicate leads from a double-submit, no broken emails from special characters, and quote answers now passed to sales.

G1 New-car leads • 3

G2 Service revenue • 3

G3 Pre-owned & trade-in • 1

G4 Brand trust • 3

G5 Measurable marketing • 1

G6 Lower risk • 2

WHAT WE FOUND

- On phones, the test-drive, quote, service and parts forms squeeze fields to slivers and labels print over each other. An earlier layout fix did not take effect. It is now corrected and live.
- Find a Dealer shows an empty list and a map that never loads, because of a script-loading order bug.
- The last homepage slide links to toyotajamaica360.com. That domain has lapsed and now shows a 'for sale' page. Whoever buys it could put anything there.
- The recall checker's results end with no next step, and one status message can mislead owners whose repair is booked but not yet done.
- Some lead emails, including safety-recall bookings, go to individual inboxes set in code.

WHAT WE'D DO

- Make every form stack to one column on phones. Test on a real iPhone and Android, and add an automated check that fails if any form field renders too narrow.
- Fix the map loading and list all 3 branches as plain text (address, tap-to-call, hours, directions) so the page works even if the map fails. Restrict the Maps API key to the site's domain.
- Remove the slide today, and consider buying the domain back to prevent impersonation.

- Separate recall results into 'completed', 'booked' and 'no open recall', each with Call and Book buttons.
- Move lead recipients out of code into an admin setting with shared-inbox defaults. Send a monthly test lead.

WHAT WE NEED FROM YOU

A decision on the lapsed domain. The right shared inboxes per lead type. The recall appointment workflow.

Book a Test Drive on iPhone: labels print over each other and the First Name field is a sliver.

Service booking on iPhone: several fields collapse and labels overlap.

Find a Dealer after 12 seconds: an empty list and a map stuck loading.

Contact-first mobile

Tap-to-call, WhatsApp, sticky action bar

Now • 0-3 mo

Effort S

G1 New-car leads • 3

G2 Service revenue • 2

G3 Pre-owned & trade-in • 2

G4 Brand trust • 2

G5 Measurable marketing • 1

G6 Lower risk • 0

WHAT WE FOUND

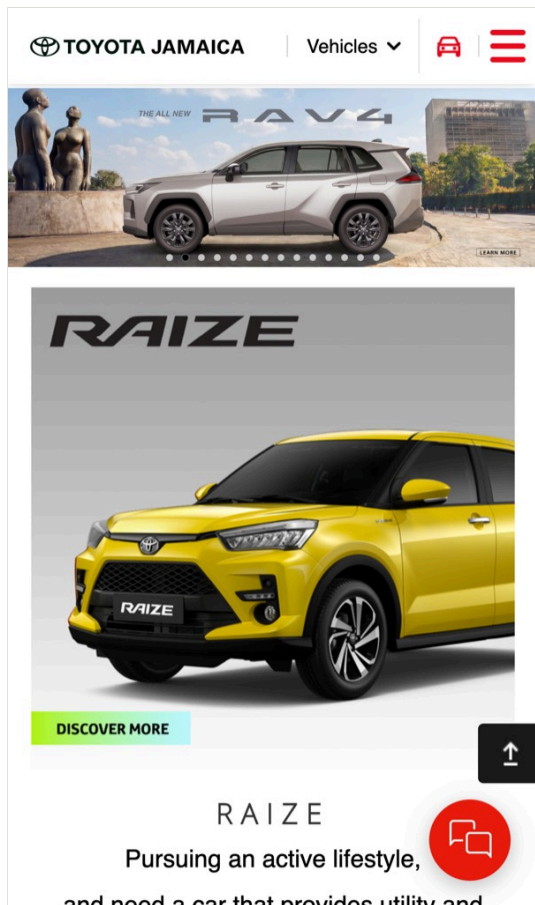

- No page on the site links a phone number or WhatsApp. The Contact page lists about 20 numbers as plain text. The only phone number on the homepage is inside an image.
- On mobile the only header action is an unlabelled car icon. On model pages the first real button sits well below the fold.
- The live chat opened full-screen on a first mobile visit in 2 of 3 tests, covering the site.
- Regional Toyota sites and ATL offer WhatsApp. Stewart's has a call button in its header.

WHAT WE'D DO

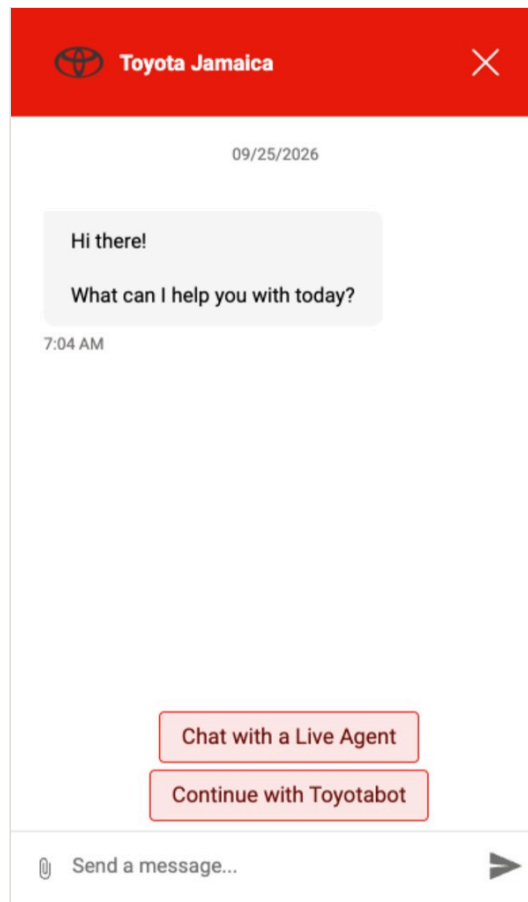

- Add a sticky bar on mobile model, pre-owned and service pages: Call • WhatsApp • Quote • Book Service.
- Add a labelled Test Drive button and a Service link to the header, and Locations and Contact to the mobile menu.
- Add a footer block for each branch: address, tap-to-call, WhatsApp, hours, directions.
- Set up WhatsApp Business, possibly through your existing Infobip account. Pre-fill the message with the model or stock number.
- Keep chat collapsed on mobile and show a gentle prompt on desktop model pages only.

WHAT WE NEED FROM YOU

WhatsApp number(s) and who staffs them per branch. The main number for each branch and department. Chat staffing hours.

Mobile homepage: strong creative, but no call or WhatsApp, and the only action is an unlabelled car icon.

First mobile visit: the chat opened full-screen over the site (2 of 3 test runs).

03

Measurement foundation

Count every lead, attribute every channel

Now • 0-3 mo Effort M

G1 New-car leads • 2 G2 Service revenue • 2 G3 Pre-owned & trade-in • 2 G4 Brand trust • 0
G5 Measurable marketing • 3 G6 Lower risk • 1

WHAT WE FOUND

- Analytics tracks only test-drive and quote forms, and counts submit clicks rather than confirmed submissions, so numbers run high.
- Service, parts, pre-owned, trade-in, fleet, call, WhatsApp and chat leads are invisible.
- Ad tags for 2 Google Ads accounts, 2 Meta pixels and LinkedIn are hard-coded into the site. No ad platform receives a lead conversion, so campaigns can't optimise toward leads.

WHAT WE'D DO

- Agree a lead taxonomy: type, model and branch.
- Send one 'lead' event on confirmed submission for every form, plus call, WhatsApp and chat taps.
- Move all ad tags into Google Tag Manager, remove the retired tags, and send lead conversions to Google Ads, Meta and LinkedIn.
- Capture the campaign source (UTM and click IDs) with each lead.
- Build a monthly lead dashboard by source, model and branch.

WHAT WE NEED FROM YOU

Admin access to GA4, Tag Manager, both Google Ads accounts, Meta and LinkedIn. Who runs paid media and which accounts are active. Any current lead counts, to set a baseline.

04 Speed quick wins

Image diet, caching, fewer scripts

Now • 0–3 mo Effort S

G1 New-car leads • 2 G2 Service revenue • 1 G3 Pre-owned & trade-in • 1 G4 Brand trust • 2
G5 Measurable marketing • 0 G6 Lower risk • 1

WHAT WE FOUND

- The mobile homepage scores 37 on Lighthouse and takes 25 seconds to show its main content on a throttled mobile connection. It downloads 20 MB, mostly full-size banner images.
- Model pages download over 20 MB, mostly colour-swatch images of about 1.7 MB each.
- A server header stops Cloudflare from caching any images. Several heavy scripts load on every page, even pages that don't use them.

WHAT WE'D DO

- Fix the cache header so Cloudflare serves images from its edge.
- Re-export banners as WebP at about 200 KB, with separate mobile crops. Load slides after the first only when needed.
- Serve resized, lazy-loaded colour swatches, and compress on upload automatically.
- Reserve space for the slider so the page doesn't jump while loading. Load charting and carousel scripts only where they are used.
- Targets: homepage under 3 MB, mobile main-content time under 4 s.

WHAT WE NEED FROM YOU

Cloudflare access and plan level. Marketing's image export process, so we can set guidelines.

05 Privacy and consent

Data Protection Act 2020

Now • 0–3 mo Effort S

G1 New-car leads • 0 G2 Service revenue • 0 G3 Pre-owned & trade-in • 0 G4 Brand trust • 2
G5 Measurable marketing • 1 G6 Lower risk • 3

WHAT WE FOUND

- Every form asks users to accept a privacy policy that is Toyota Japan boilerplate. It cites Japanese law and a Japan-only helpline.
- About 12 advertising cookies are set on first visit, with no consent choice.
- Consent wording and spam protection differ from form to form.

WHAT WE'D DO

- Your counsel drafts a Jamaica-specific privacy and cookie notice. We can supply the list of data processors and a first draft.
- Add a consent banner with Google Consent Mode, and fire ad tags only after consent.
- Use one consent line and an optional marketing opt-in on every form, with spam protection on all of them.
- Review how long lead data is kept, including email logs.

WHAT WE NEED FROM YOU

A legal contact or data protection officer. Counsel review. Your retention policy. Any Toyota Tsusho regional template.

06

Security hardening

Close exposure while the upgrade is planned

Now · 0–3 mo

Effort S

G1 New-car leads · 0

G2 Service revenue · 0

G3 Pre-owned & trade-in · 0

G4 Brand trust · 1

G5 Measurable marketing · 0

G6 Lower risk · 3

WHAT WE FOUND

- The server can be reached directly, bypassing Cloudflare's protections.
- Some developer and remote-admin plugins are installed on the live site.
- Standard WordPress files that reveal version details are publicly readable.

WHAT WE'D DO

- Lock the server so it accepts web traffic only from Cloudflare, and add rate limits on the login pages.
- Remove development and unused plugins and themes.
- Block the version-revealing files, and add uptime and form-submission monitoring.

WHAT WE NEED FROM YOU

Agreement on a short maintenance window.

07

Hygiene bundle

Small fixes that signal care

Now · 0–3 mo

Effort S

G1 New-car leads · 1

G2 Service revenue · 1

G3 Pre-owned & trade-in · 0

G4 Brand trust · 2

G5 Measurable marketing · 1

G6 Lower risk · 1

WHAT WE FOUND

- 13 of 81 vehicle URLs in the sitemap return 'not found'. Thank-you pages and the admin login page are listed for search engines.
- The site disables pinch-to-zoom on phones. The footer reads '© 2024' and has dead Hino links. The homepage carousel has 14 slides, some from 2021–2024.
- The spec comparison opens empty and shows 'undefined' labels. The quote form lists models no longer sold. There are form typos.
- Basic accessibility gaps: no skip link, low-contrast footer text, one unlabelled field.

WHAT WE'D DO

- Redirect retired model URLs to their successors and build a helpful 'not found' page.
- Remove thank-you and admin pages from the sitemap.
- Re-enable zoom, make the footer year update itself, fix or remove the Hino links.
- Retire stale slides and give each promo an end date.
- Fix the spec tool and typos, keep the quote form's model list in sync with the lineup, and fix the accessibility basics.
- Run a broken-link check every quarter.

WHAT WE NEED FROM YOU

The successor model for each retired model. Whether Hino is still sold. Sign-off to retire old promos.

08

Lead forms rebuild

Shorter, model-aware, real confirmations

Next · 3–6 mo

Effort M

G1 New-car leads · 3

G2 Service revenue · 3

G3 Pre-owned & trade-in · 2

G4 Brand trust · 1

G5 Measurable marketing · 2

G6 Lower risk · 1

WHAT WE FOUND

- Model-page buttons open generic forms, so the model and trim the shopper was viewing are lost.
- The quote form has 16 fields, including Salutation and Fax. Answers about timeframe and payment method were being dropped; they now reach the sales team (fixed September 2026).
- Service booking is a long, fax-era request form: miles instead of km, the date optional, the submit button far down the page.
- After submitting there is no thank-you page and no confirmation to the customer. A finished RAV4 brochure download exists but is switched off.

WHAT WE'D DO

- Pass the model and trim from every button and pre-fill the form.
- Cut quote and test-drive forms to about 5 required fields, and add a preferred date and time for test drives.
- Make service booking two steps: branch, service, vehicle and date first, contact details second.
- Add a thank-you page for each form with expected response times and branch contacts, plus an email or SMS confirmation.
- Turn brochure downloads back on as a lead option. Pilot a short inline form on model pages.

WHAT WE NEED FROM YOU

The minimum fields sales and service really need at first contact. Service types and branch capacity rules. Target response times.

09 **Pricing and finance path**

J\$ context, concession clarity, payment estimate

Next · 3–6 mo

Effort M

G1 New-car leads · 3	G2 Service revenue · 0	G3 Pre-owned & trade-in · 2	G4 Brand trust · 2
G5 Measurable marketing · 1	G6 Lower risk · 1		

WHAT WE FOUND

- Prices are USD-only with no 'as of' date. The '20% Concession' price isn't explained, and hybrids show no concession price.
- Most buyers finance, and banks lend on better terms for new cars than used. That is Toyota Jamaica's strongest argument against imports, and the site never makes it.
- A finished finance page with an estimator sits unused in the site theme. Toyota T&T runs one live.
- Prices are tied to hard-coded page IDs, so staff can't safely update them.

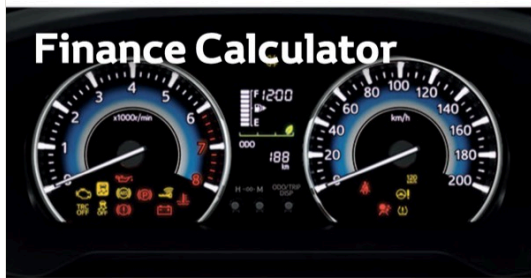

WHAT WE'D DO

- Show an approximate J\$ price and an 'updated' date next to USD.
- Link each concession price to a short explainer: who qualifies, what documents are needed, and the hybrid position.
- Revive the finance page with current partners and a document checklist, and link it from the menu and model pages.
- Add a 'from J\$X/month' estimate with a clear 'estimate only' note, and a 'Get pre-approved' form.
- Let staff manage prices and concessions from the admin.

WHAT WE NEED FROM YOU

Current finance partners and any referral arrangements. Approved indicative rates and disclaimer wording. Concession eligibility rules.

[Homepage](#) > Finance Calculator

Toyota Trinidad & Tobago, on a near-identical template, already runs a finance calculator.

10

Service and after-sales hub

Service menu, booking, recall, body shop

Next · 3–6 mo

Effort L

G1 New-car leads · 0

G2 Service revenue · 3

G3 Pre-owned & trade-in · 0

G4 Brand trust · 2

G5 Measurable marketing · 1

G6 Lower risk · 1

WHAT WE FOUND

- The service page is a banner, a heading and three buttons: no service menu, prices, hours or phone numbers.
- Booking is a request, not an appointment: no time slot, confirmation or reschedule.
- Body-shop steps, trade-in rules and parts promos are text inside images, unreadable on phones and invisible to search.
- The recall checker is buried under a long intro and accepts only 17-character VINs.

WHAT WE'D DO

- Rebuild the service page: a menu with 'from' prices (starting with the existing oil-change special), service intervals in km, 'why dealer service', branch hours, and Call, WhatsApp and Book buttons.
- Phase 2: real appointment slots per branch, with SMS or WhatsApp confirmation and reminders.
- Convert image flyers to real text. Add a body-shop estimate form with photo upload.
- Move the recall checker to the top, add a 'where to find your VIN' graphic, and support other recall campaigns.

WHAT WE NEED FROM YOU

The service menu and prices you'll publish. Each workshop's scheduling system. Body-shop insurer partners. Active recall campaigns.

Not Found, TESTFAKEVIN000000 Does NOT match any in our records.

Check to see whether your Toyota is part of a Safety Recall Campaign.

Recall checker: 'not found' with no next step to call or book.

11 Homepage and brand refresh

Task-first homepage, 'Why Toyota Jamaica'

Next · 3-6 mo

Effort L

G1 New-car leads · 3

G2 Service revenue · 2

G3 Pre-owned & trade-in · 2

G4 Brand trust · 3

G5 Measurable marketing · 0

G6 Lower risk · 0

WHAT WE FOUND

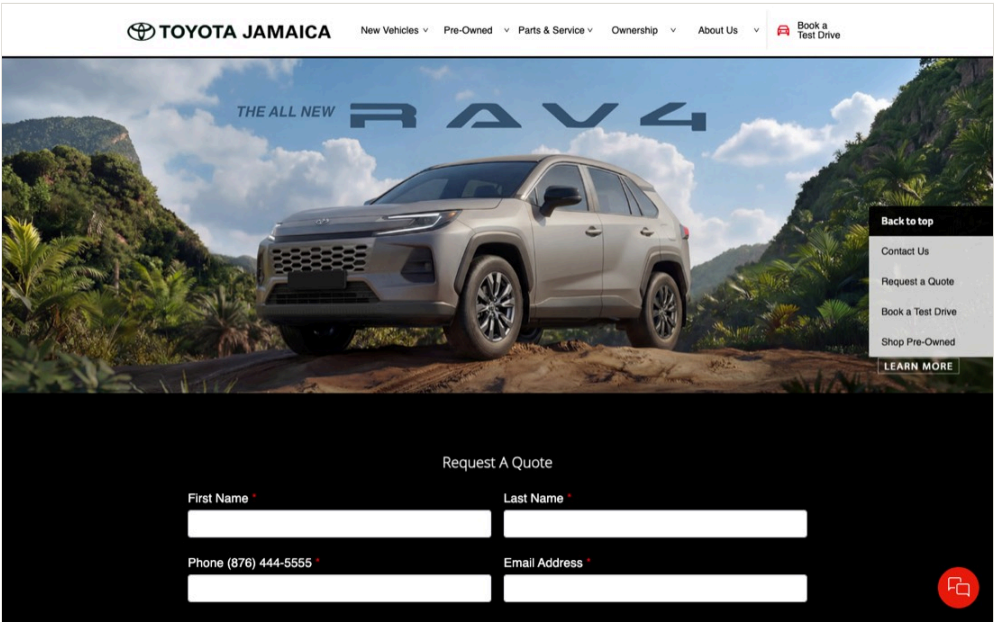

- The homepage leads with a 14-slide carousel. The text is baked into wide images and unreadable on phones.
- The homepage has no route to Pre-Owned, Service, Finance or Locations, and no visible value statement.
- Visual styles from different eras sit side by side.
- The RAV4 2026 campaign lives at a hashed URL, separate from the RAV4 model page.

WHAT WE'D DO

- Replace the carousel with 1-3 hero slides with live text, 2 buttons each and separate mobile art.
- Add quick actions (Shop New, Pre-Owned, Book Service, Get a Quote, Trade-In, Find Us), a lineup strip with prices, and a trust band: official distributor, warranty, genuine parts, 3 branches.
- Build a 'Why buy from Toyota Jamaica' page covering finance terms, warranty, recalls, genuine parts and resale. It can double as a search-ad landing page.
- Create a small design system aligned with Toyota brand guidelines, and apply it to the header, footer, homepage and model tiles first.

WHAT WE NEED FROM YOU

Toyota brand guidelines and fonts. The campaign calendar and promo owners. Approved trust claims. The brand approval process.

The 2026 RAV4 campaign page: strong local creative to build the new homepage around.

12

Search and share visibility

Model SEO, structured data, local listings

Next · 3–6 mo Effort M

G1 New-car leads · 2	G2 Service revenue · 1	G3 Pre-owned & trade-in · 1	G4 Brand trust · 2
G5 Measurable marketing · 0	G6 Lower risk · 0		

WHAT WE FOUND

- Model pages have no heading naming the model, no search description and no share image. Links shared on WhatsApp or Facebook show up bare.
- 66 of 93 indexed pages have no description.
- The newest models (RAV4 2026 and RAV4 Hybrid 2026) redirect to the homepage while they are held in review.
- Branch addresses and hours aren't marked up for Google.

WHAT WE'D DO

- Set up per-model search templates: '{Model} – Price & Specs | Toyota Jamaica', a description with the starting price, a share image and one model heading.
- Write descriptions and share images for the top 15 pages.
- Add structured data: a dealer listing per branch, vehicle offers, services.
- Align Google Business Profiles with branch pages. Publish the RAV4 2026 pages at launch.

WHAT WE NEED FROM YOU

Google Business Profile access. The RAV4 2026 launch date. Approved model taglines.

13

Platform upgrade and staging

Supported server, safe releases, admin self-service

Next · 3–6 mo Effort L

G1 New-car leads · 1

G2 Service revenue · 1

G3 Pre-owned & trade-in · 1

G4 Brand trust · 1

G5 Measurable marketing · 0

G6 Lower risk · 3

WHAT WE FOUND

- The site runs on a server whose operating system (Ubuntu 16.04) and PHP version (7.4) are past end of life. PHP 7.4 is the oldest version current WordPress supports, so plugin updates will soon stop. The pre-owned plugin already requires a newer PHP.
- Changes go straight to the live site with no staging copy.
- Parts of the custom code depend on a single developer's knowledge.

WHAT WE'D DO

- Move the site to a dedicated, supported server (current Ubuntu and PHP 8.3) with no downtime, via Cloudflare.
- Check custom code for compatibility first and fix it on staging.
- Set up a staging site, automated checks before release, nightly off-site backups with a tested restore, and uptime monitoring.
- Document the custom recall and pre-owned plugins.

WHAT WE NEED FROM YOU

Hosting budget approval. A maintenance window. Any Toyota Tsusho IT or security standards. A change-approval process.

14

Lead routing into one pipeline

CRM or dealer system, response-time tracking

Next · 3–6 mo

Effort L

G1 New-car leads · 3

G2 Service revenue · 2

G3 Pre-owned & trade-in · 2

G4 Brand trust · 0

G5 Measurable marketing · 3

G6 Lower risk · 2

WHAT WE FOUND

- Only test-drive and quote leads reach the sales system. Service, parts, pre-owned, trade-in, fleet and contact leads go to separate email inboxes.
- No one sees all leads in one place, and there is no response-time tracking and no link from a sale back to its marketing source.

WHAT WE'D DO

- Send every lead type through one pipeline, into your dealer management system or a CRM, with source, model, stock and branch attached.
- Acknowledge customers automatically and alert staff when a lead goes unanswered.
- Report response time and close rate by source each month, and send closed sales back to Google and Meta where possible.
- Route chat and WhatsApp leads into the same pipeline.

WHAT WE NEED FROM YOU

The dealer management system or CRM you use and its import options. Lead owners per branch. Current follow-up process.

15

Shopping tools and Hybrid hub

Compare models, clearer trims, hybrid savings

Later · 6–12 mo

Effort M

G1 New-car leads · 2

G2 Service revenue · 0

G3 Pre-owned & trade-in · 0

G4 Brand trust · 2

G5 Measurable marketing · 0

G6 Lower risk · 0

WHAT WE FOUND

- There is no way to compare the 5 overlapping crossovers (Raize, Yaris Cross, Yaris Cross Hybrid, Corolla Cross Hybrid, RAV4).
- Trim cards list up to 20 bullets without showing what each step up adds. RAV4 has no spec data, and some hybrid copy is wrong.
- The hybrid page is generic, omits Yaris Cross Hybrid and never puts the savings in J\$, while BYD and Haval push EVs hard.
- Only 2 models have 360° views.

WHAT WE'D DO

- Build a lineup page with filters and 'compare up to 3'.
- Add 'Everything in X, plus...' to trim cards. Fill spec gaps and have product staff check the hybrid copy.
- Hybrid hub: a J\$ fuel-savings calculator, battery warranty, 'hybrid vs EV: no charging needed', and every hybrid with price and payment.
- Source press images and 360° views for all models.

WHAT WE NEED FROM YOU

Local fuel-price assumptions. Access to Toyota press, spec and 360° assets. Hybrid concession policy.

16

Pre-owned and trade-in growth

Guided trade-in, richer listings, alerts

Later · 6–12 mo

Effort L

G1 New-car leads · 1

G2 Service revenue · 1

G3 Pre-owned & trade-in · 3

G4 Brand trust · 2

G5 Measurable marketing · 1

G6 Lower risk · 0

WHAT WE FOUND

- Only 4 certified pre-owned cars are listed, too few for shoppers to return (ATL shows 11).
- Trade-in is a free-text contact form with no eligibility check and no estimate, and it isn't linked from the new-car path.
- Pre-owned listings have no monthly payment and no alerts.

WHAT WE'D DO

- Guided trade-in: model, year, km, condition and photos, with an instant eligibility check and an indicative range or 'valuation within 24h'. Link it from every quote and pre-owned page.
- Add a J\$ monthly estimate and a concrete certified promise (inspection, warranty, returns) to listings.
- Add 'notify me when a <model> arrives' alerts.
- Work with your team to feed more trade-ins into certified stock.

WHAT WE NEED FROM YOU

Target pre-owned inventory. Certified warranty and inspection terms. Your trade-in valuation approach.

17

Owner retention

Reminders, maintenance plans, accessories

Later · 6–12 mo

Effort L

G1 New-car leads · 1

G2 Service revenue · 3

G3 Pre-owned & trade-in · 1

G4 Brand trust · 2

G5 Measurable marketing · 1

G6 Lower risk · 0

WHAT WE FOUND

- After purchase the site offers static information only: no service reminders, no accessories, no maintenance plan or extended warranty.
- Toyota T&T and Costa Rica both sell maintenance plans online.

WHAT WE'D DO

- Offer service-reminder sign-up (plate, model, km, WhatsApp or SMS opt-in) with automated reminders.
- Add a prepaid maintenance plan or extended warranty page, offered in the quote and finance flows.
- Add an accessories catalogue per model, with seasonal offers such as a pre-hurricane check or A/C service.
- Later: an owner area with service history and open recalls.

WHAT WE NEED FROM YOU

Whether maintenance plans, extended warranty or accessories exist or are planned.
Access to service history. A messaging budget.

18

Business, fleet and storm-season hub

Commercial lineup, fleet quotes, insurance claims

Later · 6–12 mo

Effort M

G1 New-car leads · 2

G2 Service revenue · 2

G3 Pre-owned & trade-in · 0

G4 Brand trust · 2

G5 Measurable marketing · 0

G6 Lower risk · 0

WHAT WE FOUND

- Rental fleets buy about a quarter of new vehicles, yet the Fleet menu item is hidden and the page is thin.
- There is no insurance-claim or replacement path, though motor claims rose sharply after Hurricane Melissa.

WHAT WE'D DO

- Restore a Business/Fleet menu item. Build a hub with the commercial lineup, lease-vs-buy, fleet service packages, client stories and a volume-quote form.
- Add a 'Storm-ready and insurance claims' page: body-shop claims process, partner insurers, a replacement fast track and a pre-season inspection offer. Aim to have it live well before the June 2027 season. A lighter version could go up sooner.

WHAT WE NEED FROM YOU

Your fleet and leasing offer. Referenceable fleet clients. Hino status. Insurer partnerships.

19

Stock availability and reservation

'Available now', deposits, build-your-deal

Later · 6–12 mo

Effort XL

G1 New-car leads · 2

G2 Service revenue · 0

G3 Pre-owned & trade-in · 1

G4 Brand trust · 2

G5 Measurable marketing · 1

G6 Lower risk · 0

WHAT WE FOUND

- Shoppers can't see what's in stock, which colours are available, or when a unit arrives. ATL lists new inventory, and Toyota Costa Rica takes online reservations.

WHAT WE'D DO

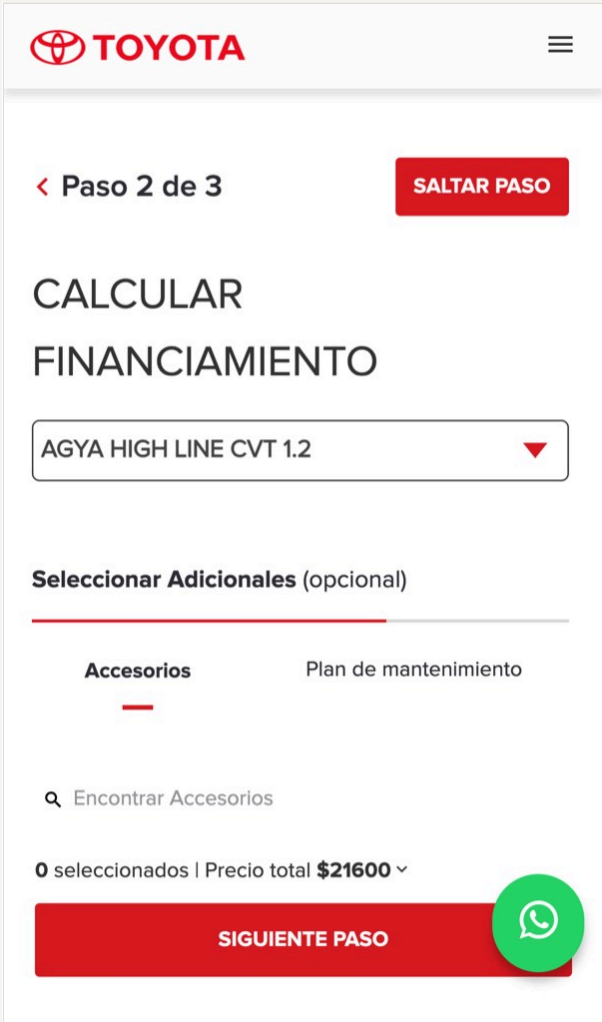

- Phase 1: 'Available now / arriving soon' badges per model and colour, from an admin list or a stock feed.
- Phase 2: a refundable J\$ deposit to reserve an incoming unit. This could start as a WhatsApp or phone-assisted flow.
- Phase 3 (optional): one flow combining trim, payment estimate, trade-in and reservation.

WHAT WE NEED FROM YOU

Whether stock data can be shared. Your appetite for public stock visibility. Deposit and refund policy.

Where Toyota Jamaica stands

- **The main rival is often a used import, not another brand.** Jamaica imported about three used vehicles for every new one in 2023 (Gleaner, Jan 2024). Banks lend on better terms for new cars, but the site never makes that case.
- **Chinese brands and EVs are arriving fast.** ATL is BYD's Caribbean master dealer and also sells MG and Omoda/Jaecoo. Stewart's sells GWM Haval. Toyota's hybrid range is its answer, but the site's hybrid page is a generic explainer.
- **Fleet matters.** Rental companies buy roughly a quarter of new vehicles in Jamaica (Observer, Jan 2025). The fleet page is thin, and its menu item is hidden.
- **Hurricane season.** After Hurricane Melissa (Oct 2025), one insurer reported motor claims up about 30%. Stewart's ran a relief pledge. Toyota Jamaica's site offers no insurance-claim or replacement path.
- **Regional Toyota sites are ahead on buying tools.** Costa Rica has a step-by-step quote builder with a maintenance plan and WhatsApp. Panama features trade-in and KINTO leasing. Trinidad & Tobago has a finance calculator and a maintenance plan.

Toyota Costa Rica: quote builder with a maintenance-plan add-on and a floating WhatsApp button.

"—" means we did not find it in a mobile review of the public site in September 2026. It may exist deeper in the site.

8 • QUESTIONS FOR YOU

What would sharpen this plan

1. What are your top 2–3 priorities for the next 12 months: new-vehicle volume, service bay use, pre-owned growth, hybrid mix or fleet? This sets the weights in section 4.
2. Roughly how many web leads do you get per month by type? How many arrive by phone, WhatsApp or walk-in instead? Have mobile form leads dropped recently?
3. What does your analytics show for the mobile vs desktop split?
4. Which system receives your sales leads today (dealer management system or CRM)? Can you confirm recent web leads arrived correctly, and can your sales team work with us on the lead-handling improvements in initiatives 8 and 14?
5. Would you like a WhatsApp Business number? Who would staff it at each branch?
6. Who runs paid media? Are both Google Ads accounts and both Meta pixels still active?
7. Who are your finance partners, and can we publish indicative rates and a 'from J\$X/month' figure?
8. Who qualifies for the 20% concession price, and do hybrids qualify?
9. Do you want to buy back toyotajamaica360.com to prevent impersonation?
9. Who is your data protection contact, and does Toyota Tsusho have a regional privacy template?
1. Which service menu and prices are you willing to publish? Do the workshops use a scheduling system?
2. What pre-owned inventory level are you aiming for, and how do you value trade-ins today?
3. Are maintenance plans, extended warranties or accessories available or planned?
4. Are there Toyota brand guidelines or asset libraries we should work from? Could we coordinate with Toyota T&T, who share this template?
5. Is Hino still part of the range, and is fleet leasing offered?

We reviewed the live site on an emulated iPhone 13 and a 1440px desktop. We ran Lighthouse and accessibility scans, crawled links and sitemaps, and read the theme and plugin code. We benchmarked against Jamaican dealer sites and regional Toyota distributors. We did not submit any forms. A second reviewer spot-checked the key claims against the live site before publication. Market figures cite their published source. We had no access to your analytics or lead data, so all impact scores are estimates, to be recalibrated once measurement is in place (initiative 3).
